

ODOT staff will be meeting in a conference room for this meeting. The number you can call is 740-833-8004.

Below is a loose agenda for tomorrow's meeting. Like I said previously, this meeting will be a good time to discuss any questions or concerns, along with discussing a schedule and funding sources for this future project.

Agenda:

1. Open discussion of both proposed options:
  - a. Option 1:
    - i. Curb and gutter replacement
    - ii. Full-depth pavement repairs adjacent to curb and gutter replacement (2' wide)
    - iii. 1.5" mill and fill
    - iv. Potential drainage work (catch basins, conduit, etc.)
  - b. Option 2:
    - i. Installing concrete aprons in front of drainage structures
    - ii. Pavement grinding in front of drainage structures
    - iii. 1.5" mill and fill
  - c. What is the preferred option?
2. Moving forward:
  - a. OPWC Funding Application
  - b. Project timeframe
    - i. Currently ODOT has this piece of SR-316 scheduled to be paved with SR-752 in our FY 2020 (most likely to be constructed in Calendar Year 2020, as well)
  - c. Project Designer
  - d. Overall Schedule

Thank you for all of your help and we look forward to the meeting tomorrow at 11AM.
